Creative Mobile Interiors Delivers Medical Simulation Units

(COLUMBUS) – The expression “practice makes perfect” is especially true in medicine.

Now surgeons will be able to sharpen their heart catheterization skills onboard two unique demo medical simulation motor coaches, manufactured by Columbus-based Creative Mobile Interiors (CMI) for Natick, Massachusetts-based Boston Scientific in partnership with

ting foot inside. In addition to a full exterior graphics wrap featuring a Boston Scientific graphic with logo, tagline and web address, each coach features an extra side exit door, served by lightweight aircraft aluminum steps that stow in the coach’s underbay when not in use. A 18-foot mechanical awning has an electronic sensor to automatically retract should winds reach 13 mph.

Denver-based SimSuite Medical Corporation.

“These coaches are identical and they’re unlike anything we’ve ever designed and built before,” said CMI President Owen Connaughton.

The 35-foot, MCI F-model coaches’ uniqueness is apparent before ever set-

The front lounges of the 35-foot, 28,560-pound vehicles feature a 37-inch Panasonic plasma television, with a Sony DVD/CD/VCR entertainment system and VGA input so that a laptop computer can use the TV as a display monitor if desired. The walls and cabinets are finished in maple laminate, and seating for four people is available on

creative mobile interiors

a flip-down bench and two 1950's soda fountain-style drum stools with chrome bases.

A 3/4-inch Plexiglass wall and double swing door lead to the rear lounge and the SimSuite medical simulation theater. A talking dummy patient lies atop the operating table, which is flanked by SimSuite's simulated clinical environment, including seven flatscreen LCD monitors, 3-D imaging equipment and x-ray and vital sign monitors. The wall behind the patient features a panoramic photo mural that creates the impression of a large operating room.

The coaches are carpeted and feature chrome hardware throughout. All interior colors were selected to match those in the Boston Scientific corporate identity. In addition to a local area computer

network, each coach features a global positioning mapping, tracking and alarm system which accessible over the Internet to let the company know where the coach is at all times. A 12,000-watt generator and 4,000-watt inverter automatically charge the coach batteries when needed.

CMI was founded in 1999 and is headquartered in four plants totaling 21,000 square feet in Grove City, Ohio. The company specializes in converting motor coaches, vans, trailers and mini-coaches into luxury, commercial and specialty vehicles outfitted with custom top-of-the-line amenities and electronics. Since its founding, the company has doubled or nearly double in size every year. For more information, CMI can be reached at (614) 539-4600, or at www.creativemobileinteriors.com
